PROFILE

I'm a passionate Computer Science and Engineering student who loves learning new things and finding creative solutions to tough problems. I enjoy challenges and believe they help me grow, both personally and professionally. I'm excited to bring my curiosity, energy, and fresh ideas to a team where I can keep learning and make a real impact.

EDUCATION

Bachelor Of Engineering-Computer Science

Peri Institute Of Technology|2022-2026

• CGPA-8.2

PROJECT

Profit Pulse – Stock Market Learning Tool(Website)

Built a beginner-friendly platform to analyze stock trends and track investment learning progress. Focused on simple visualizations, interactive tools, and educational insights. Used Python, Flask, and basic web technologies.

Technologies used: *Figma, Html, Css, React, Github and VS code.*

Dopez(Front-end-website)

Developed the front-end of a café website, including complete design and UX research to ensure a user-friendly and visually appealing experience.

Technologies Used: *Figma, Html, Css, JavaScript, Github and VS code.*

AJ Home Decor (Front-end-Furniture website)

Built a front-end website for a Furniture store, including complete design and UX research to ensure a user-friendly and visually appealing experience.

Technologies Used: *Figma, Html, Css, JavaScript, Github and VS code.*

TECH SKILLS

- Web Development(Html, Css, Js)
- Cyber Security
- Python
- C
- SQL
- JAVA

SOFT SKILLS

- Teamwork
 - Time Management
 - Leadership
 - Effective Communication
 - Critical Thinking
-
